

Protective Turtle Ecology Center for Training, Research, and Outreach, Inc.

Honduras Turtle Adoption Program

ProTECTOR is a research project conducted by Loma Linda University's Marine Biologist, Dr. Stephen G. Dunbar on the ecology, biology and conservation of endangered sea turtles in the waters of Honduras, Central America (for more information see www.TurtleProTECTOR.org).

To increase awareness and gather conservation and funding support for the **ProTECTOR**, we have developed the **Honduras Turtle Adoption Program** that provides an opportunity for you to adopt sea turtles as a part of the **ProTECTOR** program.

Donor Name: _____ Phone _____

Donor Address: _____

Adopter Name(s) to be printed on certificate: _____ Circle Turtle Preference (see below)
